

LEARNING FROM THE GROUND UP

Texas Farm Bureau's Garden Grant Program 2016 - 2017 School Year

School gardens are an excellent way to take learning outside the classroom providing students valuable real-world agricultural experiences. The research is clear and shows students benefit academically and socially, all the while learning where their food comes from.

Texas Farm Bureau, along with Ag in the Classroom, plays an integral role in providing information and support to teachers throughout the state. LEARNING FROM THE GROUND UP provides further opportunity to include agricultural concepts across the curriculum. We encourage you to pass this information on to a teacher or administrator in your county. Application can be made through your county Farm Bureau and will begin August 2016.
