TEXAS FARM BUREAU®

About Texas Farm Bureau Ag in the Classroom

Texas Farm Bureau's Ag in the Classroom program brings agriculture to life for students by providing engaging, accurate, and easy-to-use educational resources. Through hands-on learning materials, interactive lessons, and classroom presentations, the program connects students and teachers with the farmers and ranchers who grow their food, fiber, and fuel.

Ag in the Classroom focuses on growing agricultural literacy and helps educators integrate agriculture into subjects like science, math, and social studies. Free resources—including activity booklets, lesson plans, and digital content—are TEKS-aligned, making it simple to incorporate real-world agricultural concepts into curriculum.

In addition to classroom resources, the program offers professional development opportunities and grants for public, private, and homeschool educators.
